Objective

B.Tech Computer Engineering graduate with foundational knowledge of Core Java, SQL, Data Structures and Algorithms, and Object-Oriented Programming. Familiar with REST API concepts, HTTP methods, JSON, and MVC architecture, and currently learning the Spring Framework. Seeking an entry-level Java Developer, Software Engineer, or Trainee position to apply my programming knowledge and develop hands-on software development skills.

Education

B.Tech in Computer Engineering, University of Mumbai (2021–2026)

CGPA – 7.12

HSC, Maharashtra Board (2021) – 86.83% | **SSC, Maharashtra Board (2019)** – 74.60%

Projects

SupportDesk – Customer Support Ticketing CRM

[GitHub Link](#)

Java 21, Spring Boot, Spring Security, MySQL, Hibernate, Cloudinary, Docker

- **Full-Stack CRM:** Developed an enterprise ticketing platform using Java 21 and Spring Boot for customer support and issue tracking.
- **Auth & Security:** Implemented role-based agent authentication, session control, and route access guards using Spring Security.
- **Media Management:** Integrated Cloudinary Java SDK v2.0 (`cloudinary-http5`) via a thread-safe singleton Spring bean for profile avatar uploads.
- **Database Concurrency:** Designed relational schemas in MySQL 8.0 with Hibernate/JPA, enforcing optimistic locking to preserve data integrity during ticket updates.
- **Email Notifications:** Configured Gmail SMTP to automatically dispatch real-time confirmation emails to customers upon ticket creation.
- **Deployment:** Containerized the application using a multi-stage Docker build on Alpine Linux and deployed the production instance to Render.

NutriScan - Food Health & Sustainability Scanner

- Contributed to a team project building a web application that helps users check food health and environmental impact
- Assisted in planning the user flow and interface design
- Participated in testing the application for smooth user experience
- Collaborated with team members on feature discussions and improvements
- Gained exposure to web development concepts and team collaboration

Technical Skills

Programming	Java, JavaScript (Basic)
Java & CS	Basic Java, OOP, Exception Handling, Java Collections, Data Structures & Algorithms
Database	SQL, MySQL, Basic MongoDB
Backend	REST API Concepts, HTTP Methods, JSON, MVC Architecture
Framework	Spring Framework (Currently Learning)
Web Technologies	HTML, CSS (Basic), Familiar with React & Node.js
Tools	Git, GitHub, VS Code

Certifications

- **Spoken Tutorial, IIT Bombay** – Java, Python, C, PHP & MySQL
- **AICTE PARAKH** – Programming and Data Structure Test
- **Cisco Networking Academy** – Python Essentials 2
- **Infosys** – Full Stack, Cloud Computing, Tableau & Virtualization

Soft Skills

Analytical & problem-solving	Communication & teamwork
Quick learner & adaptable	Time management
