Profile

B.Tech Computer Engineering graduate interested in Java and backend development. Comfortable with Core Java, OOP, SQL, collections and problem solving, with hands-on experience building a backend-focused project using Spring Boot, MySQL and JPA/Hibernate. Currently strengthening my understanding of Spring and backend development through project-based learning.

Education

B.Tech in Computer Engineering University of Mumbai	2021 – 2026 CGPA: 7.12/10
Higher Secondary Certificate (HSC), Maharashtra Board Percentage: 86.83%	2021
Secondary School Certificate (SSC), Maharashtra Board Percentage: 74.60%	2019

Projects

SupportDesk – Customer Support Ticketing CRM Live Demo — [GitHub](#)

Java 21, Spring Boot, Spring Security, MySQL, JPA/Hibernate, Cloudinary

- Built a customer support application where customers can create and track support tickets while support users can manage incoming tickets.
- Structured the application using Spring Boot with separate controller, service and repository layers, and connected the application with MySQL.
- Added login and role-based access using Spring Security so different users can access the parts of the application relevant to their role.
- Used JPA/Hibernate for database operations and worked with relational entities for customers, tickets and related information.
- Added profile avatar uploads using Cloudinary and connected the upload flow with the user's profile.
- Configured email notifications using Gmail SMTP to send confirmation emails when a customer creates a ticket.

NutriScan – Food Health & Sustainability Scanner

- Contributed to a team project focused on helping users understand the health and environmental impact of food products.
- Worked with the team on user flow, interface planning, testing and discussing improvements to the application.
- Gained practical experience with web development and working as part of a project team.

Technical Skills

Languages	Java, JavaScript (Basic)
Core Java	OOP, Exception Handling, Collections, Data Structures & Algorithms
Backend	Spring Boot, Spring Framework, REST API Concepts, HTTP, JSON, MVC
Database	SQL, MySQL, Basic MongoDB, JPA/Hibernate
Web	HTML, CSS (Basic), Familiar with React and Node.js
Tools	Git, GitHub, VS Code

Certifications

- Spoken Tutorial, IIT Bombay – Java, Python, C, PHP & MySQL
- AICTE PARAKH – Programming and Data Structure Test
- Cisco Networking Academy – Python Essentials 2
- Infosys – Full Stack, Cloud Computing, Tableau & Virtualization

Additional

Strengths: Problem solving, communication, teamwork, quick learning and adaptability.
